

RFP: Utility Network GIS and Infrastructure Asset Mapping Modernization

Project Description

Regional utility operator requires a GIS modernization initiative to consolidate electric, water, and underground infrastructure assets into a network-enabled GIS environment supporting field operations and asset lifecycle management.

Budget Range

USD 300,000–700,000

Timeline

Start: Sept 15, 2026 | End: Jun 15, 2027

Technical Requirements

- Utility Network implementation
- GPS and mobile field collection integration
- SCADA interoperability
- Asset management APIs
- Spatial QA/QC workflows

Required Services

- Asset inventory digitization
- Field verification
- Data schema design
- GIS integration
- Workforce training

Deliverables

- Utility network datasets
- Infrastructure asset registry
- Mobile field applications
- QA reports

Evaluation Criteria

Technical solution 30%; Utility experience 25%; Data quality approach 20%; Staffing 10%; Cost 15%

Suggested Provider Skills

Utility GIS, network tracing, field mobility, SCADA integration, asset management
